SUMMARY

Barnacle Bill is a traditional style Narrowboat, which was built in 1991 by North West Fabrications. It's a well-constructed liveaboard boat that has benefited from much recent maintenance. In its recent history it has been grit blasted and 2-pack epoxy blacked following recommendations from a survey, at which time the hull received some steelworks from a highly regarded yard.

A survey from 2022 is available for prospective purchasers to view, to give confidence in the condition of the hull.

Lying: Glasgote Basin, Coventry Canal
